

Dualis Protocol

Tokenizing Conflict & Peace Dynamics

Abstract

Dualis Protocol is a blockchain-based platform transforming conflict and peace dynamics into a tokenized economy using WAR and PEACE tokens.

Problem

Lack of public engagement and economic models around peace leads to limited understanding of global conflicts.

Solution

Interactive simulation platform where users influence outcomes using tokens.

Platform Overview

Includes Simulation Engine, Token Economy, and DAO Governance.

Tokenomics

WAR: fixed supply, high risk. PEACE: dynamic supply, governance utility.

Game Theory

Short-term gains favor WAR, long-term incentives favor PEACE.

Technology

Built on Stellar blockchain with low fees and fast transactions.

Features

Simulations, predictions, staking, and token swaps.

Governance

DAO-based voting using PEACE tokens.

Business Model

Revenue from fees, premium features, and NFTs.

Global Peace Index

Metric representing ecosystem peace balance.

Roadmap

Phased development from MVP to full DAO.

Risk & Ethics

Focus on education and avoiding exploitation.

Conclusion

A new economic paradigm rewarding peace-driven decisions.
